EDITORIAL INTRODUCTION

This is a new edition of the index to the publications of the Wellington Shell Club from 1956 to 1996, which was issued as *Cookia* Vol. 7 (4) in December 1996, compiled by Jill Burnet, who has now brought it up to date to include all publications to a cut-off date of Volume 26 of *Cookia* issued in November 2014.

The Wellington Shell Club held its first meeting on 26 May 1955. Over the next 60 years a great deal of information has been published by its members in the form of *Circulars* (the first of which appeared in December 1956), later as *Bulletins* (from 1967) and continuing as *Cookia* from 1976 to the future. Additionally, resulting from Study Groups held at meetings where particular topics were to be discussed, the speakers or group leaders prepared *Study Notes* which were distributed to participants. Although knowledge of many of our molluscan families has increased markedly since some of these meetings were held, the *Study Notes* still remain a most significant and useful part of the Club's activities over the years.

In the second issue of *Cookia*, in 1976, Mr W.J. Paul, celebrating the Club's 21st birthday, summarised the history of the Club's publications and noted: "In all, 21 circulars, 35 bulletins and 30 sets of study notes have been issued. A record of which the club can well be proud." And proud we are, indeed, as we now celebrate our 60th anniversary. However, full use of this mass of published information and records of past activities has been very much hampered by the lack of an index to it. Now, thanks to Jill Burnet's devoted and skilled work, we have the key to opening this treasure chest!

As we come to use Jill's index [not, apparently, our very first index since a five page species index was published after the third part of *Cookia* in 1976], we can appreciate the contributions that many individuals made, as well as the collective overall contribution of the Club itself, to knowledge of New Zealand molluscs, in addition to documenting by way of the records of field trips and meetings the particular enjoyment members have in this common interest. We should also note here, with grateful appreciation, the boost to the Club that Dr Alan Beu and Dr Frank Climo have given through their leadership at Study Groups. Our "resident conchologist," Dr Bruce Marshall has given wonderful support and encouragement to Club members, allowing ready access to the National Mollusc Collections, as well as valued identifications.

HISTORY AND DATES OF PUBLICATION

Quite a number of the various publications that the Club has issued carry no indication of the date. We have had to do some detective work, such as looking at the dates of meetings recorded therein or other internal evidence, to try to work out a proper chronological history. Occasionally there seem to have been some informal and undated "handouts" at various meetings but these are difficult to trace over a 60-year period.

The *Circular* began with No. 1 in December 1956 and concluded with No. 21 on or after October 1965; the *Bulletin* began with an undated issue No. 1 in early 1967 and concluded with No. 36 also undated but after April 1975. Volume 1 No. 1 of *Cookia* is marked "Autumn 1976", and this series is still going strong. The *Study Notes* were apparently first issued on 29 January 1970 with the most recent issue being for 26 September 1991, a few having been published also (or alternatively) in *Cookia*. These have now been numbered retrospectively in this Index to distinguish them more readily (since we believe that newer members may wish to obtain copies of some of them and do their own taxonomic updating in terms of the *Checklist of Living New Zealand Mollusca* which we now use as the standard nomenclatural reference.

Full details of the individual numbers and dates of publication of each of these series can be found in the Index under "Wellington Shell Club" (issues originally undated being marked *).
Volume 7 of *Cookia* concluded with its 4th part. From then on, the numbered "parts" arrangement were not be used, so each new issue of *Cookia* was have its own number as a "volume."

Following the publication of *Cookia* each year (usually in November), the Index will be updated and treated for library purposes as a 'Supplement' to that year's *Cookia*, and available to members on the Club's website, *www.wellingtonshellclub.org.nz/*, as a searchable PDF. It will also be available as a CD, if requested. Members can print off a hard copy from either medium, if convenient. For those without access to a computer, hard copies can be ordered on demand; for those who prefer to keep their copies in loose-leaf printed form, the updated pages can be similarly provided.
